## Making Pheromone Mating Disruption Work in Walnuts

Field Meeting

Friday, April 25, 2008

8:30 – 10:00 AM

More walnut orchards than ever are under mating disruption for codling moth, many for the first time this season. Come learn how to use this new technology to optimize management of codling moth and integrate it into your orchard pest management program, including:

- *Best techniques for monitoring codling moth development, populations, and damage in mating disrupted blocks*
- *How to decide if and when supplemental codling moth insecticide sprays are needed*
- *Selecting insecticides that optimize biological control of aphids and other walnut pests*

### **Speakers include:**

*Dr. Steven Welter*, UC Berkeley Entomologist and a pioneer of codling moth mating disruption research and implementation in California

*Carolyn Pickel*, Sacramento Valley IPM Advisor

*Joe Grant*, UC Farm Advisor, San Joaquin County

See map & directions on next page.

Location: Anderson-Barngrover Ranch (east of Stockton in San Joaquin County)  
East side of North Jack Tone Road, ¼ mile south of Comstock Road
